Lecture 26: Paralanguage

Prof. Binod Mishra

DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

“Words mean more than what is set down on paper. It takes the human voice to infuse them with shades of deeper meaning.”

- Maya Angelou in *I Know Why the Caged Bird Sings*

[This Photo](#) by Unknown Author is licensed under [CC BY-NC-ND](#)

Vocalics

- ❑ Paralanguage is otherwise known as Vocalics.
- ❑ The name suggests the study of voice in relation to the language of speech.
- ❑ The field was opened by American linguist George L. Trager.
- ❑ The role of voice plays crucial role in:
 - Transference of emotions.
 - Conveying the relevance and importance of idea.
 - Constructing and supporting the generated meaning.

Tone
Rate
Volume
Pace

Language of Voice

- ❖ The role of voice plays a pivotal role in delivering the intention behind the message.
- ❖ Intention reveals not just the idea, but also the emotional value.
- ❖ Thus, a proper message delivered in a suitable voice creates a larger effect.
- ❖ For an effective voice, proper training is needed for smooth articulation and clear pronunciation.

"I didn't **SAY** you were stupid."
"I didn't say **YOU** were stupid."
"I didn't say you were **STUPID**."

[This Photo](#) by Unknown Author is licensed under [CC BY-SA-NC](#)

Voice and Emotions

- ❑ Research findings suggest the following criteria such as:
 - Speaker's intonation
 - Prosody
 - Vocal effort
 - Speaking rate
- ❑ Voice has the potential to reflect the speaker's emotional state (Nygaard and Lunders 583).
- ❑ Lexical ambiguities of the spoken word are bridged by proper equipment of the above-enlisted speech techniques.
- ❑ The delivery of emotions appropriates the speaker's intention to the audience with much more precision.

Intonation

- ❖ It refers to the pattern of pitch variation in particular.
- ❖ The speaker's effort to shift the pitch with each utterance of a word offers detailed information to the listener.
- ❖ The speech melody of a person's utterance is intonation.
- ❖ In English, the intonation is usually observed in the dichotomy of rising and falling.

[This Photo](#) by Unknown Author is licensed under [CC BY-SA](#)

Determinants of Paralanguage

- Ferdinand Poyatos in his book *Non-Verbal Communication across Disciplines* mentions different factors determining vocalics:

Biological

- Sex
- Age
- Vocal band size

Physiological

- Long-term malfunctions
- Pitch disorders
- Traumatized states

Psychological

- Loudness of extroversion
- Manic-phase Depression

Occupational

- Voice variation dynamics in professional world.

Sociocultural

- Cultural stereotypes and styles.

Features of voice

Volume

Rate

Pitch

Pronunciation

Silence and Pauses

Pitch

Volume

Pace

Volume of Voice

- Loudness
 - Softness
- } Intonation
- Voice level variation sense
 - Audible and clear
 - Acoustic awareness and amplification
 - Ensure your voice is engaging and not imposing
 - Keep the volume of your voice in control

[This Photo](#) by Unknown Author is licensed under [CC BY-NC-ND](#)

voice levels

0	no talking
1	"spy talk"
2	partnership & small group
3	normal voice
4	presenter
5	outside

[This Photo](#) by Unknown Author is licensed under [CC BY-ND](#)

Pronunciation

- ❖ Proper pronunciation is usually determined by effective articulatory control.
- ❖ “Ideal articulatory voice control is of a slow tempo, anything under it would qualify as over slow, unnatural control” (Poyatos 52).
- ❖ Pronunciation control depends on the following four body parts:
 - Laryngeal
 - Pharyngeal
 - Lingual
 - Labio-facial
- ❖ International Phonetic Alphabet (IPA) is prescribed for accurate pronunciation.

Rate of Speech Delivery

- ❖ An ideal delivery should neither be too fast nor too slow.
- ❖ The primary purpose of the speech shall be achieved at a controlled pace.
- ❖ However, the rate can be slowed down if the topic is relatively new or complex to the audience.
- ❖ Audience awareness is essential to determine the rate of delivery.
- ❖ Time duration of the presentation should also be considered.

130 to 150 words
per minute is
ideal.

Pitch Vibration

- ❖ Vocal Cord Vibration - Production of sounds
- ❖ Inflections
- ❖ Feelings
- ❖ Pitch variation is essential for the speaker to avoid being monotonous.
- ❖ Stress in sounds is integral during an oration.

[This Photo](#) by Unknown Author is licensed under [CC BY-ND](#)

Silence and Pauses

- ❑ A point of separation/break/shift from one topic to another.
- ❑ Elongated pause results into a silence.
- ❑ Silence is a non-verbal cue.
- ❑ Silence as a form of communication has various implications with respect to the culture addressed.

Advantages of Silence

- ✓ Thought process
- ✓ Reactions
- ✓ Introspection
- ✓ Decision making

Common Lapses in Articulation

- ❖ **Throatiness:** Deep resonance in your voice
- ❖ **Breathiness:** Passage of too much air through vocal cords
- ❖ **Nasalization:** Releasing air through the nose
- ❖ **Harshness:** Inhibited flow of air
- ❖ **Muffled:** Lazy lip and jaw movements
- ❖ **Hoarseness:** Inflammation of larynx (voice-box)

Conclusion

- ❖ Paralanguage, as the name suggests, is not just an aid for the language but essentially supports the speaker's idea and intention.
- ❖ Paralanguage posits itself as a perfect tool for persuasion.
- ❖ A vocal person seems to present himself as more confident and bold.
- ❖ Human voice reflects human emotions, as Longfellow once said that the “human soul is audible; not visible”.
- ❖ A voice filled with genuine emotion is capable of forming and connecting social bonds easily.

“ O how wonderful is the human voice! It is indeed the organ of the soul. The intellect of man sits enshrined visibly upon his forehead and in his eye; and the heart of man is written upon his countenance. But the soul reveals itself in the voice only, as God revealed himself to the prophet in the still small voice, and in a voice from the Burning Bush. The soul of man is audible, not visible. A sound alone betrays the flowing of the eternal fountain invisible to man.”

- H.W. Longfellow in *Hyperion*

Lecture 27: Meta-communication

Prof. Binod Mishra

DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

“When we no longer use communication to communicate but to **communicate about communication**, as we inevitably must in communication research, then we use conceptualizations that are not part of, but about communication. This is called **meta-communication.**” (288)

- Paul Watzlawick in his book *Pragmatics of Human Communication*

[This Photo](#) by Unknown Author is licensed under [CC BY](#)

Introduction

- Gregory Bateson and Jurgen Ruesch introduced the term meta-communication in 1951.
- It was through their publication of the book *Communication: The Social Matrix of Psychiatry*.
- The term means “communication about communication”.
- Meta-communication refers to one’s ability to convey multiple messages simultaneously.
- It is a secondary form of communication on meaning-making and interpretation.

Communication *about* Communication

Components of Meta-communication

- Negotiation happens between these three realms.
- Each realm may **support/contradict** the communication established by another.

Examples of Meta-communication

Stephen Tyler in his book *Said and the Unsaid* illustrates a few examples of meta-communication being direct and indirect in nature :

Direct (What is being said)	Indirect (How it is said)
I'm only joking	Tone of voice
This is serious	Intonation
When I say X, I mean Y	Gestures
This is only hearsay, but...	Posture
I heard that...	Eye movements
I'm speaking to you as a friend	Facial Expression

Meta-language

- Logician Alfred Tarski introduced the term “meta-language” in the year 1933.
- Like meta-communication, it implies the employment of language to understand better about language.
- In meta-language, language evolves from being a means of communication (process) to the reason (cause) of communication in itself.
- Meta-language essentially comprises **grammar** as its fundamental aspect.
- Grammatical knowledge enables participants to have a proper grip on meta-linguistic abilities.

Meta-communication in Indian Background

- Tarski's concept of metalanguage was introduced to the field of Indian logic and grammar in the year 1962.
- Scholars like Staal and Scharfe juxtaposed meta-language with Panini's grammar for critical study.
- Frits Staal argues that the ideas on meta-communication were prevalent in ancient Indian discourses themselves.
 - *Upadeśa* (the language of grammatical instruction)
 - *Anubandha* (metalinguistic marker)

Communication and Meta-communication

- Communication theorists deconstructed the communication as an action into two essential components:
 - a. Content
 - b. Relationship
- The content denotes the meaning that the verbal and non-verbal codes signify.
- While the relationship denotes the sequential and contextual value.

“Every communication has a content and a relationship aspect such that the latter classifies the former and is, therefore, a meta-communication” (Watzlawick 54).

Silence as Meta-communication

- “Activity or inactivity, words or silence all have message value: they influence” (Watzlawick 49).
- Adding on to the three realms of meta-communication, silence occupies an integral part of conveying meaning.
- Even the physical stillness of the speaker, at times, gets attributed to **postural silence**.
- Some communication theorists find the meaning generated by silence direct, while others appreciate the meaning of silence in its ambiguity (Penna 10).

Advantages of Pauses

- ✓ In public speaking, pauses are employed to emphasize and add weight to the content delivered.
- ✓ It can benefit both the reader and listener by providing a sufficient time gap before shifting from one topic to another.
- ✓ Pauses provide time-space for the speaker to avail more precision in their choice of words.
- ✓ It is an integral part of active listening where the speaker cares to listen to the questions/suggestions from the other end.

Meta-message

- ❖ An underlying meaning.
- ❖ A meta-message is what is communicated but not said.
- ❖ It could be understood when **read between the lines**.
- ❖ It conveys the speaker's attitude and feelings.

Factors Controlling Meta-message

Environment

Behaviour

Skills

Needs

Appeal

Beliefs

Derrida's Graphematic Structure of Communication

- French philosopher Jacques Derrida critiques the viewpoint of perceiving communication as solely phonocentric.
- He argues that any form of communication essentially incorporates a structure of writing for itself.
- The term “graphematics” refers to the linguistic field of studying writing systems and their basic components, i.e. graphemes.
- Writing as a communicative system always supplements the verbal part.
- “Meta-communication pastes itself on communication, it is not possible to turn communication discrete” (Mateus 7).

Meta-communication in Digital Medium

- ❑ Communication through texting platforms such as Facebook, Twitter, Instagram etc., deals a lot with metacommunication. For instance, in texting,
 - All capitals would mean an excited state of response.
 - Lack of emojis may express disinterestedness.
 - Skipping salutations and greeting in e-mail writing becomes rude and informal.
 - Leaving people's text "on read" signifies **virtual silence** as a part of meta-communication.

How to Meta-communicate Properly?

- ❖ Awareness of one's meta-communicative approach makes the overall transmission of the intended message fluent and smooth.
- ❖ The proper combination of intended words and unintended cues determines the effectiveness of the message.
- ❖ Interests, feelings and emotions could be transferred well through effective meta-communication.
- ❖ Language and Paralanguage go hand in hand for establishing better communication.

“One cannot not communicate.”
- Paul Watzlawick

PUBLIC SPEAKING

LECTURE 28: CONVERSATION

Prof. Binod Mishra

DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

Persuasion versus Conversation

- ❑ Human communicative interaction involves an expression of attitudes, behaviours, needs, reasoning, feelings and viewpoints.

Persuasion is the art of convincing others to give favourable attention to our point of view. It intends to influence the beliefs, attitudes, values and acts of others.

PERSUASION

Conversation can be defined as oral and usually informal exchange of views, ideas and emotions. It is the most common form of dyadic communication.

CONVERSATION

Persuasion has become a pervasive part of our everyday life – finds application in advertising, marketing, sales, political campaigns.

PERSUASION

Strongly Disagree

Neutral

Strongly Agree

Logical Supports of Persuasion

Inductive Reasoning
Arriving at a conclusion through observing specific cases

Deductive Reasoning
Applying a generally stated law to a particular case

Syllogism
Premise 1: All birds have wings.
Premise 2: All ostriches are birds.
Conclusion: Therefore, all ostriches have wings.

What is Conversation?

- ❑ “A talk, especially an informal one, between two or more people, in which news and ideas are exchanged.” (OED)
- ❑ “The most fruitful and natural exercise for our minds is, in my opinion, conversation. I find the practice of it pleasanter than anything else in life; and that is the reason why, if I were at this moment forced to choose, I would, I believe, rather consent to lose my sight than my hearing or speech” (Montaigne).
- ❑ “Preserve me from the thing I dread and hate,
A duel in the form of a debate.” (William Cowper)

Types of conversation
according to Adler,
Personal
Intellectual
Practical

Views of Creative Writers on Conversation

- ❑ “To my taste the most fruitful and most natural exercise of our minds is conversation. I find the practice of it the most delightful activity in our lives” (Montaigne).
- ❑ “...we intend by it that reciprocal interchange of ideas by which truth is examined, things are, in a manner, turned round and sifted, and all our knowledge communicated to each other” (Henry Fielding, ‘An Essay On Conversation’).
- ❑ “Some, without any ceremony, will run over the history of their lives; will relate the annals of their diseases, with the several symptoms and circumstances of them; will enumerate the hardships and injustice they have suffered in court, in parliament, in love, or in law” (Jonathan Swift).

Contd...

- ❑ “He lends his ear to an observation as if you had brought him a piece of news, and enters into it with as much avidity and earnestness as if it interested himself personally” (William Hazlitt).
- ❑ “Of all things, banish the egotism out of your conversation, and never think of entertaining people with your own personal concerns or private affairs; though they are interesting to you they are tedious and impertinent to everybody else” (Lord Chesterfield).

Henry Fielding's Views

- ❑ “First, that every person who indulges his ill-nature or vanity at the expense of others, and in introducing uneasiness, vexation, and confusion into society, however exalted or high-titled he may be, is thoroughly ill-bred.”
- ❑ “Secondly, that whoever, from the goodness of his disposition or understanding, endeavors to his utmost, to cultivate the good-humour and happiness of others, and to contribute to the ease and comfort of all his acquaintance, however low in rank fortune may have placed him, or however clumsy he may be in his figure or demeanor, hath, in the truest sense of the word, a claim to good-breeding.”

Purposes of Persuasive Speaking

Strengthening Commitment

To strengthen the commitment of the listeners to a belief they already possess

- Raise consciousness about the cause.
- Lead from educating to commitment.
- Convey a sense of urgency.

Weakening Commitment

To weaken the belief of an audience committed strongly in opposition to the views of the speaker

- Find a critical distinction.
- Develop a contrary claim.
- Present a sound and strong refutation.

Conversion

To alter listener's belief - abandoning one idea and replacing it with another

- Identify a pattern of anomalies in the belief.
- Aim for a slow conversion- in gradual modest steps.

Inducing a Specific Action

To move the audience from a strong belief to a specific action

- State the desired action specifically and precisely.
- Make the task easy to perform – through preparations beforehand.

Elaboration Likelihood Model

- ❖ **Elaboration** refers to audience's tendency to think critically about the message of the speech.
- ❖ When audience's **elaboration tendency is high**, the persuasive power depends upon the **standards of arguments** and **logic of reasoning**.
- ❖ In case of audience's **low elaboration**, the persuasive power depends upon the **positive ethos** and **likeability** of the speaker.

A Fair Approach to Persuasion

AUDIENCE -SENSITIVITY
Motivate audience to willingly
consider the other side.

QUALIFIED LANGUAGE
Avoid overstatement & over-
generalization.

***“The pendulum of the mind
alternates between sense
and nonsense, not between
right and wrong.”
– Carl Jung***

OBJECTIVITY
Fair, Honest, Evidence-based

COMMON GROUNDS
Do not target the audience
as opposition; look for
commonality.

Interpersonal Conversation: Influencing Factors

A healthy and engaging conversation stems from underlying **interpersonal attraction**. This bond is shaped and strengthened by **five major factors**:

1. **Nearness** – Physical proximity between two individuals strengthens the attraction between them, provided other factors like their personal beliefs and attitudes are not in gross conflict with each other.
2. **Similarity** – Similar interests, attitudes and momentary feelings create a stronger adhesive bond between strangers.
3. **Social Adaptability** – People with healthy self-concepts and a poised sociable attitude are more attractive than either extremities of the attitude like excessive superiority, egoism, timidity or withdrawal.
4. **Social Status** – We tend to get attracted towards people who provide us with recognition and praise.
5. **Physical Attributes** – First impression cast by the physical characteristics of an individual – like appearance, clothing, calorie count, energy level, body language – play a crucial role in interpersonal attraction.

Requisites of Conversation

- ☐ Common ground
- ☐ Interest
- ☐ Attention
- ☐ Time and space
- ☐ Curiosity
- ☐ Observation
- ☐ Eye contact
- ☐ Feedback

Psychological Climate of Healthy Conversation

A **healthy conversation** can be defined as an interpersonal interaction facilitated in a **cohesive environment**, in which the participants achieve a mental state of **psychological safety** and **freedom of thought and expression**.

Carl R. Rogers, in his book '*On Becoming a Person*' (1961), counsels on the psychological conditions that aid a healthy conversation –

- ❑ The **degree of warmth and cordiality** they feel with each other
- ❑ The **willingness to be frank and honest** in their expression of ideas and emotions
- ❑ The **degree of congruence** of their experiences and awareness – the greater the congruence, the higher is the mutual satisfaction in relationships.

"In my relationship with persons, I have found that it does not help, in the long run, to act as though I were something that I am not.

I find that I am more effective when I can listen acceptably to myself, and can be myself."

- Carl R. Rogers
On Becoming a Person (1961)

Conversational Variety

NARRATIVE

A sequence of events recounted either in chronological or otherwise order

E.g. – Recounting an anecdote

DESCRIPTION

Conversation describing what/how things look, feel, taste, sound or smell like

E.g. – Describing experience of a trip

CONVERSATION

EXPOSITION

Description of processes and patterns, explanations and analysis

E.g. – Explaining how to cook a dish

ARGUMENT

Expression of one's point of view to persuade or influence others based on evidence or reasoning

E.g. – Arguing for/against the system of biometric attendance for students

General Purposes of Conversation

Raymond S. Ross, in his book ***Speech Communication: Fundamentals and Practice***, enlists five primary purposes or agendas of conversation:

Social Gatherings – For fun, joy, companionship

To **ventilate** our pent-up feelings to a sympathetic listener

Therapeutic – To seek help, counsel, support or information

Bargaining – To negotiate differences in a cooperative manner

Evaluation – To ask for feedback or to evaluate

The Art of Conversation

Sir Richard Steele, in his essay ***The Art of Conversation***, instructs:

- ❑ The ideal conversation should not be a laboured one, rather should be readily and clearly apprehended.
- ❑ In a conversation, the chief end should be neither to affect silence nor to flaunt eloquence.
- ❑ Pedantry is the outcome of much reading but little comprehending.
- ❑ Conversation ought to be neither an attempt to polite sycophancy nor of a determined disputation.

“The great enemies, therefore, to good company, and those who transgress most against the laws of equality which is the life of it, are, the clown, the wit, and the pedant.”

- Sir Richard Steele
(Spectator, No.100)

Contd...

- ☐ In case of a difference of opinions, one should introduce one's point of view by some agreeable circumlocution.
- ☐ One should exhibit patience and curiosity to understand the speaker.
- ☐ To possess and express good sense and goodwill are the vital qualities for companions in an ideal conversation.
- ☐ The ideal conversationalist ought to practise deference in disagreements.

Precautions during Conversation

- ❖ Arguments
- ❖ Slander
- ❖ Sarcasms
- ❖ Blasphemy
- ❖ Indecency
- ❖ Remembrance of some untoward past
- ❖ Neither a dirge at a wedding nor an epithalamium at a funeral

Etiquettes of Conversation

DO's

- ✓ Begin the talk with a topic of common interest
- ✓ Occasionally address the person by name
- ✓ Be mindful of your language and demeanor
- ✓ Cultivate a cheerful and friendly tone
- ✓ Practise attentive listening

DON'Ts

- × Abstain from being dogmatic or argumentative
- × Avoid use of superfluous vocabulary
- × Do away with exaggeration and affectation
- × Do not sound impatient or flustered
- × Do not use slang

let's talk

“Everything we hear is an opinion, not a fact.
Everything we see is a perspective, not the
truth.”

~ Marcus Aurelius

Thank You!

PUBLIC SPEAKING

Lecture 29: Negotiations

Prof. Binod Mishra

DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

What is Negotiation

- Etymology – Latin: *neg* (Not) + *otium* (Leisure) i.e. not at leisure, or, business.
- A communicative process of resolving conflicts.
- Mediated through argumentation and persuasion to achieve a decision cordial to both the negotiating parties.
- A specialized skill relevant to diverse arenas – business, governance, diplomacy, day-to-day life.

“Negotiation means getting the best of your opponent” (Marvin Gaye).

On Defining Negotiation

- Negotiation is any form of meeting or discussion in which you and the persons you are in contact with use argument and persuasion to achieve an agreed decision or action. - Alan Flower
- A process of combining conflicting positions into a common position under a decision rule of unanimity, a phenomenon in which the outcome is determined by the process. -- Zartman

“All government —
indeed, every human
benefit and enjoyment,
every virtue and every
prudent
act — is founded on
compromise and
barter.”
-Edmund Burke

Negotiation is a technique, an art.

It's something you use when it's to your advantage.

And something you don't use when it's not to your advantage.

- JOHN BOLTON

Approaches to Conflict Resolution

❑ Out of the several approaches to resolve a dispute between two conflicting parties, negotiation holds the crown of being the most sought after strategy.

❑ Merits of negotiation:

- ✓ A **voluntary** act
- ✓ Offers a feasible **win-win** situation
- ✓ Mediated not through authority but via **cordiality**.
- ✓ The most **tactical** and **strategic** method

To Negotiate or Not: The Alternatives

- ❑ Negotiation hinges upon the scheme of giving away something to get something. For instance, a mother negotiates with her daughter: If you drink your vegetable juice, then you can watch your favourite cartoon on TV.
- ❑ However, there are instances when approaches other than negotiation seem to fare better than either of the conflicting parties – **ATNA** (**Alternative to a Negotiated Agreement**): For example; strike, litigation, war, or avoidance.
 - **BATNA** – Best Alternative to a Negotiated Agreement
 - **WATNA** – Worst Alternative to a Negotiated Agreement
 - **MLATNA**- Most Likely Alternative to a Negotiated Agreement (Guasco & Robinson 2007)
 - **PATNA** – Probable Alternative to a Negotiated Agreement (Wade 2008)
 - **Plan B** – Possible courses of action to resort to, if negotiation fails.

WATNA

- Produces an outcome inferior to the negotiation gain
- Symbolizes the weaker party
- Negotiation: a better option

PLAN B

- More the number of plan Bs →
- Greater the flexibility of the party →
- Lesser the vulnerability

BATNA

- Produces superior outcome than the gain by negotiation.
- Source of power.
- If BATNAs are likely, don't go for negotiation.

An Example

BATNA

Buy directly from other owners, cutting the cost of middlemen

WATNA

Keep driving the car, until it breaks down

I want to buy a used car

Plan B

Look out for budget options, like a new bike.

Eunson's Model of Negotiation

Styles of Negotiation

According to Thomas Kilmann's conflict mode model,

- ❖ **Competing**: The goal is to win; highly assertive and un-cooperative mode.
- ❖ **Collaborating**: The goal is to find a win-win solution; highly assertive as well as cooperative.
- ❖ **Compromising**: The aim is to land on a middle ground.
- ❖ **Accommodating**: Yielding mode; low assertiveness and high cooperativeness.
- ❖ **Avoiding**: The goal is to delay; low assertiveness and low cooperativeness.

Negotiation: Types

Distributive Negotiation

Positional or
Hard-Bargaining
Negotiation

I win - you lose
model

The parties try
to yield
minimum and
gain maximum

Unstable
outcomes, poor
relationship
between the
conceding parties

Integrative Negotiation

Interest-based
or Principled
Negotiation

I win – you win
model

The parties
focus on shared
interests to
achieve mutual
gains

More likely to
form cordial
relationship
between the
parties

Negotiation Strategy: The Preliminaries

1. **Research** – Probe into the concerned parties’ –
 - ✓ Facts and Figures
 - ✓ Strengths and Weaknesses
 - ✓ Goals and Objectives
 - ✓ BATNAs and Plan B
 - ✓ Fall-backs and Bottom-lines
 - ✓ Uncover Common Interests
2. **Plan** –
 - ✓ Develop your arguments in advance
 - ✓ Try to predict the counter-positions
 - ✓ Practice aloud the arguments and replies

Negotiating Territory	Advantages	Disadvantages
Our Place	Familiarity Greater control Ample access to resources	Responsibility of hospitality Risk of breach into privacy
Their Place	Lesser interruptions Easier to walk out Leverage of delaying	Higher Stress Cost-inefficient High vulnerability – lesser control
No Man's land	Both parties at equal footing More conducive to reach agreement	May lack resources May get complicated with a third-party involvement

4. Time –

Art of Negotiation: Skills and Stratagems

Communicative Skills

- Speak naturally
- Avoid jargons
- Use short sentences
- Give proper pauses

Listening and Questioning Skills

Be attentive to implicit meanings

Statements generate resistance, questions generate answers

Persuasive Skills

- Frame strong arguments
- Back your position with sound logic
- Exploit your influencing factors

Signalling Skills – Learn to code and decode verbal and non-verbal signals that tend to contradict or differ from what is uttered.

Signal Type	Example	Meaning	Response
Qualifier	“We will not sign the agreement in that form.”	Show me a better version of the agreement.	“We can re-consider the paragraphs you take objection to...”
Concealed Appeal	“If only you’d listened to us in the last rounds.”	We’d be pleased to have some ritual apology first before getting on with it.	“Yes, we made an error. But we can still prevent the disaster”.
False Refusal	“We won’t be doing this contract until tomorrow.”	There’s still room – try harder.	“Thank you, I’ll see if I can come up with a better version in the last round.”
Hypothetical	“Let’s assume we sign the deal. Would you be able to meet the deadline?”	We’re interested but we don’t want to seem convincing yet.	“Absolutely, You just need to rest your confidence in us.”

Becoming a good negotiator calls for being a proficient communicator – one who is sensitive to the following:

- ❑ **Non-verbal signals** – Listen through what remains unsaid. Read the gestures, postures, eye contacts, appearance and tone.
- ❑ **Cultural diversity** – Show sensitivity to cultural differences.
- ❑ **Gender disparity** – Make room to accommodate the varied outlook of the heterogeneous genders in negotiation.

PRINCIPLED NEGOTIATION

Pillars of Principled Negotiation

People –
Separate the
people from the
problem

Interests – Focus
on interests, and
not positions

Options – Invent
multiple options
aiming at mutual
gains

Criteria – Stick to
certain principled
standards

Stratagems to Strike the Best Deal

- Introduce yourself confidently.
- Grab the power seat.
- Present decent and unaffected manners.

- Maintain personal tidiness, dress appropriately.
- Avoid loud makeup and strong perfumes.
- Keep papers, pens and other tools organized and handy.

- Manifest a positive outlook.
- Avoid using negatives for the opponent party.
- Focus on branding the exclusive ideas of your arguments.

- Adopt a flexible approach.
- Allow time, space and concessions for the other party.
- Avoid rigidity.

Resolving Deadlock

- ❖ Emphasize the consequences that could flow from a deadlock
- ❖ Allow no further relaxations
- ❖ Use the ethical aspect of the agreement
- ❖ Stay positive on a mutually agreed solution

Give the other party a deadline

Don't make the first bid

Use silence when necessary

Play it cool and light

Never respond too quickly to an offer

Be willing to walk away

Be courteous in victory

Be graceful in defeat

PUBLIC SPEAKING

Lecture 30: Debates

Prof. Binod Mishra

DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

Debate: An Indispensable Art

Debate is a form of public speaking which involves the process of **inquiry** and **argumentation** in order to arrive at a **reasoned judgement** on a **proposition**.

- ❑ An indispensable skill for a democratic society – since majority of its decisions are arrived at by debates in law-courts and legislative bodies.
- ❑ The ancient Greek scholar, **Aristotle**, emphasized the significance of debate in its four functions:
 - It **checks** the triumph of **fraud and injustice**.
 - **Rhetoric**, a crucial component of debate, serves as a **method of instruction** for the society.
 - It generates a **balanced outlook** by making us see both sides of a case.
 - A powerful tool to **safeguard our interests**, freedom and rights in a democratic society.

Methods of Decision Making

Debate: Types

The Debating Process

1. The Debate Proposition

- The debate proposition is a statement that identifies the central issue in a controversy.
- The debate proposition ought to:
 - Clearly state the controversy.
 - Deal with one single significant contemporary idea/problem.
 - Be expressed in a single declarative sentence
 - Avoid ambiguity and emotional terms.
- Debate involves two parties –
 - The **affirmative side**, arguing in favour of the stated proposition.
 - The **negative side**, arguing against the stated proposition.

Phrasing the Debate Proposition

Exploring the Controversy

Researching for Evidence

Corroborating Reasoning

Building the Constructive /
Deconstructive Argument

2. Exploring the Controversy

- For a productive debate, **controversy is an essential prerequisite**. An informed clash of ideas, interests or positions motions the debate towards effective judgement.
- A rigorous enquiry into the controversy involves:
 - ☐ Brainstorming of ideas
 - ☐ Gathering background materials
 - ☐ A critical reading of the sources
 - ☐ Recording materials in an organized form
- The sources for researching into the controversial debate question include :-

3. **Researching for Evidence** – Evidence consists of facts, opinions, objects and statements that are used as raw materials to validate one's arguments.

☐ Checklist for **evidence credibility**:

- ✓ **Quantity** – There should be enough evidence to support an argument.
- ✓ **Consistent** – One evidence should cohere with other known evidences as well as within itself.
- ✓ **Verifiable** – One must be able to authenticate, confirm and substantiate the evidence.
- ✓ **Fair** – Evidences free from prejudices strengthen ground for arguing one's point.
- ✓ **Competent** – Statistically sound and relevant evidences build a winning case.
- ✓ **Reliable** – Sources of evidence should be trustworthy, accurate and honest.
- ✓ **Acceptable to the audience** – The evidence should be consistent with the beliefs, motives, values and comprehensive standards of the audience.

4. Reasoning: Types

The process of inferring conclusions from the stated premises is termed as reasoning.

Example:

All men are mortal.
(Premise)
Socrates is a man.
(General to Specific)
Socrates is mortal.
(Conclusion)

Example:

Every cat I have seen
had green eyes.
(Specific Case)
Most cats probably
have green eyes.
(Conclusion – Specific
to generalization)

Reasoning by Example

- Inferring conclusion from specific cases

Reasoning by Analogy

- Comparing two similar cases and inferring that what is true in one case must be true for the other as well

Reasoning by Sign

- Inferring relationship between two closely related variables
- Presence/absence of one may be equated with that of the other

Debate Standards: Matter and Manner

- ❑ Matter and manner are the twin customary criteria foundational for judging the standard of debate.

The Matter: Argument

- ❑ An argument is a collection of statements structurally organized with the purpose of justification of acts, beliefs, attitudes, interests or positions.
- ❑ Argument is the fundamental component of persuasion, which in turn, is the key motive of the debating party.

Fallacies in the Argument

Fallacy of Pseudo-arguments

Arguing in a Circle

Using Popular Appeal

Appealing to Tradition

Baiting an Opponent

Asking Pseudo-question

Substituting Bombast
for Argument

Fallacy of Language

Ambiguity

Verbosity

Complexity

Emotionally Charged

Insensitive to Diversity

Incorrect Grammatical
Structure

Fallacy of Reasoning

Insufficient Evidence

Hasty Generalization

Incorrect Analogy

Weak Support for Claim

Prejudiced Approach

Manipulation of Facts
and Figures

The Matter: Reasoning the Argument

- ❖ **Constructive Argumentation** – Building the arguments favouring your position in the debate proposition.
- ❖ **Steps to Constructive Argumentation:**

The Matter: Reasoning the Argument

- **Deconstructive Argumentation** – Critiquing and refuting the opposition's arguments.
- Steps to Deconstructive Argumentation:

The Manner: Structuring the Argument

- ❖ Well-structured arguments are crucial to effective debating.
- ❖ **Progression:** The arguments should be neatly structured into –
 - **Introduction** – A *preview* that foresees the development of main arguments
 - **Body** – The substance of the argument
 - **Conclusion** – A *review* summarizing the message and providing a definite conclusion
- ❖ **Coherence** – The arguments should feature a clear relationship between what has just been said and what will be said next.
- ❖ **A Definite Order** – The major arguments should be presented in the same order each time they are called in.
- ❖ **Tag-lining** – Repeating an idea consistently and redundantly (for example, through tag-lines) creates an *echo-effect* and helps in cementing the idea in the mind of the audience.
- ❖ **Unity** – The arguments should be bound towards attaining a unified objective, and therefore, exhibit *unity of purpose* and *unity of mood*.
- ❖ **Emphasis** – The weighty argument should be positioned either in the beginning or towards the end for providing greater emphasis.

The Manner: Style of Delivery

CONCISENESS

Be succinct in the expression of ideas
Use powerful and concise words.

CLARITY

Present your case with clarity of thought and jargon-free expressions.

INCLUSIVE LANGUAGE

Use inclusive, non-offensive and culturally appropriate language

APPROPRIATE VOCABULARY

Select the diction of arguments suited to the audience and to the occasion.

SIMPLE and CONCRETE

Use simple structure in sentences
Choose exact words over vague terms.

The Manner: Steps to Good Delivery

NON-VERBAL COMMUNICATION

Vocal Expression

☐ Rate – Moderate

☐ Pitch – Varied

☐ Intensity –
Adapted to
Occasion

☐ Tone – Flexible

☐ Verbal Fluency

Body Language

☐ Eye Contact –
Direct

☐ Movement –
Purposeful

☐ Gestures – Aid in
Communicating

☐ Facial Expression –
Confident

☐ Posture – Relaxed

- ☐ **Speech Outline** – Get ready with a detailed plan of exactly **the content (the ‘what’)** and **the manner (the ‘how’)** of your speech.
- ☐ **Speaker Notes** – Prepare notes in advance for
 - ✓ The key points of your speech
 - ✓ The responses to anticipated arguments of refutation.
 - ✓ Also, record notes from the opponent’s speech for an effective refutation.
- ☐ **Prepare and Practise** – Prepare by building a strong case and rehearse your delivery. Improve upon your presentation by listening to professional speakers.

Dare to Debate – Do's and Don'ts

QUESTIONER

- ☐ Avoid open-ended questions
- ☐ Elicit brief responses
- ☐ Keep questions brief
- ☐ Do not attack the incontestable

RESPONDENT

- ☐ Be on guard
- ☐ Avoid unreasonable questions
- ☐ If you do not know the answer, admit it
- ☐ Do not defend the indefensible

BOTH

- ☐ Conduct with courtesy and professionalism
- ☐ Avoid distracting mannerisms
- ☐ Show passion, sincerity and confidence
- ☐ Prepare and practice

*It is better to debate a question
without settling it than to settle a
question without debating it.*

JOSEPH JOUBERT
