- a) The HTML source file is updated
- b) The page permanently changes color
- c) The DOM is updated live, but resets on page refresh
- d) Nothing happens

Answer: c

◆ DOM Tree and Nodes

5. Which of the following is NOT one of the three main node types in the DOM?

- a) Element node
- b) Text node
- c) Comment node
- d) Attribute node

Answer: d

6. What nodeType value represents an Element node?

- a) 3
- b) 8
- c) 1
- d) 0

Answer: c

7. What nodeType value is returned for a Comment node?

- a) 1
- b) 3
- c) 8
- d) 5

Answer: c

8. The DOM is structured as a:

- a) Linked list
- b) Stack
- c) Tree
- d) Queue

Answer: c

◆ Accessing Elements in the DOM

9. Which method is used to access a single element by its unique ID?

- a) getElementById()

- b) `querySelector()`
- c) `getElementById()`
- d) `getElementsByName()`

Answer: c

10. What does `getElementsByClassName()` return?

- a) A single element
- b) A JSON object
- c) An array-like object (`HTMLCollection`)
- d) A boolean

Answer: c

- a) `.`
- b) `*`
- c) `@`
- d) `#`

Answer: d

12. Which method returns all elements matching a CSS selector?

- a) `querySelector()`
- b) `getElementById()`
- c) `querySelectorAll()`
- d) `getElementsByName()`

Answer: c

13. What is the correct CSS selector symbol for a class in `querySelector()`?

- a) `#`
- b) `.`
- c) `*`
- d) `@`

Answer: b

◆ **Traversing the DOM**

14. Which property returns only element children (excluding text and comment nodes)?

- a) childNodes
- b) firstChild
- c) children
- d) lastChild

Answer: c

15. What does parentElement return when called on the <html> element?

- a) document
- b) window
- c) html
- d) null

Answer: d

16. Which property gets the next sibling element (skipping text nodes)?

- a) nextSibling
- b) nextElementSibling
- c) childNodes
- d) lastChild

Answer: b

17. document.body is a property of which object?

- a) window.screen
- b) navigator
- c) document
- d) location

Answer: c

◆ **Modifying the DOM**

18. Which method creates a new HTML element?

- a) createTextNode()
- b) createElement()
- c) insertBefore()
- d) appendChild()

Answer: b

19. Which method adds a new node as the last child of a parent element?

- a) insertBefore()
- b) replaceChild()
- c) appendChild()
- d) removeChild()

Answer: c

20. To remove a child node from the DOM, which method is used?

- a) deleteChild()
- b) destroyNode()
- c) removeChild()
- d) clearChild()

Answer: c

21. Which property should be preferred over innerHTML for security reasons?

- a) innerText
- b) textContent
- c) nodeValue
- d) htmlContent

Answer: b

◆ **Attributes, Classes, and Styles**

22. Which method checks if an element has a specific attribute?

- a) `getAttribute()`
- b) `setAttribute()`
- c) `hasAttribute()`
- d) `removeAttribute()`

Answer: c

- a) The new class is added alongside existing ones
- b) Nothing changes
- c) All existing classes are overwritten
- d) An error is thrown

Answer: c

◆ Events in JavaScript

26. What is an event listener?

- a) A CSS rule triggered by user action
- b) An interface attached to an element to wait and respond to an event

- c) A built-in JavaScript function
- d) A method to create DOM elements

Answer: b

27. Which method is used to attach an event listener to an element?

- a) onclick()
- b) attachEvent()
- c) addEventListener()
- d) bindEvent()

Answer: c

28. What is the advantage of addEventListener() over event handler properties?

- a) It is faster
- b) Multiple listeners can be added to the same event on the same element
- c) It works only with mouse events
- d) It does not need a callback function

Answer: b

29. Which keyboard event fires continuously while a key is held down?

- a) keydown
- b) keyup
- c) keypress
- d) keyhold

Answer: c

30. Which event object property helps identify the most deeply nested element that was clicked?

- a) event.source
- b) event.node
- c) event.element
- d) event.target

Answer: d
