

TECHNICAL REPORT WRITING FORMAT

(word limit: 350 words)

The Title: It should give a very concise overview of the whole report

Eg.: A Study of the Chlorine Content in the Drinking Water Supplied in Anantapur District

Report submitted/prepared by: Name, Designation

Eg.: Dr. Biswas, Head of the Water Supplies of the Anantapur District

Report submitted to: Name, Designation

Eg.: Shri. S.R. Reddy, Minister of Health and Hygiene of the State of Andhra Pradesh

Report submitted on: 10th January 2018

Table of Contents: Page no. next to the title of each sub-section/figure

Executive Summary:	1-2
Objectives	3
Introduction OR Purpose & Background	4-5
Methodology	6
Work Completed	7-8
Work Scheduled	9
Problems/ Constraints	10
Conclusions/ Findings	11
Recommendations	12
Annexures	13-16

Executive Summary/Abstract of the content of the report:

Increase of patients; district health care advised calculation of chlorine content in drinking water; methodology: labs testing of samples from different areas; findings- high/low, dangerous/safe; recommendation: allocation of devices/machines to reduce chlorine content/evaluation of ch content at regular intervals, etc.

Objectives: Restating the given task / question/ Sample vocab: 'to evaluate' 'to verify' 'to measure' 'to compare' / Use present tense/ avoid subjectivity

Eg: To investigate the reasons for a large number of Senior citizens developing health issues
To evaluate the effect of high amounts of chlorine in the potable water of ATP

Introduction/ Purpose / Background: What is the purpose/scope of the project,

Eg.: Rising ill-health among senior citizens of the district, report by the district Public Health Officer, GO to test water, PWD given the task (Annexure- No. of cases of arthritis, GO from PHO, etc.),

Methodology:

Undertaken by, designed by, suggested by, sponsored by, funded by, marketed by,

Eg: project sponsored and funded by the health ministry, amount allocated Research associated appointed, sample water collected. Testing at 5 diff labs

(In case of Progress Report - **WORK COMPLETED** / Also add **WORK SCHEDULED**

Eg: samples collected/ lab reports expected in 10 days/ stats analysis will take a month for 1000 samples/ final reports by April end.)

Problems / Constraints / Discussion: difficulties in the process

Eg: Lockdown lead to labor shortage/ full funds not released etc.

Results/ Findings: Evaluation of results, inferences/implications, etc. (use active voice)

Eg: We found that.... reasons for increase- pesticides, all samples had same results, problem at the supply level, etc; use numerical values , table etc.

Conclusions: Convey the results, findings and bring a close to the earlier sections.

Eg: From 1000 samples tested at 5 private and 2 govt. labs we can conclude that pesticides used in excess affects ground water....

Recommendations: Steps which can be taken for better results in future (use should/must)

Eg: use eco-friendly methods of farming/chemicals recently introduced which can help in reducing the chlorine content, more updated techniques, etc.

Annexures: attach documents relevant to the study

Eg: Annexure 1: Govt. order from PHO to study water samples

Annexure 2: Proposal for Govt funds to carry out sample testing

Annexure 3: appointment of Research Associates

Annexure 4: Lab test reports
